**Read the Instructions carefully and then create your own comic:**

**TOONDOO:** A web tool for the creation of comics or comic books!

First of all, you have to use the Internet. Create an account completely free!

Comic Creation

We click on this sign.

The following page comes up, where you can choose your layout from the following options:.

If we want the layout with two scenes, a new window appears:

On the top bar of the site, there is a menu with the following options:

Choice	Description
	Choose characters (man, woman, kid, animal…)
	Choose background (space, indoors, outdoors...)
	Choose objects (food, trees, …)
	Choose text to write your dialogues
	Choose brushmen
	Choose special effects (Christmas, birthday,….)
	Choose cliparts
	Choose from the image your image gallery

Let's imagine our story is happening indoors. Then we choose from the menu: **Backgrounds☞Indoors** and we drag and drop the background on the scene.

The next step is to put our characters on the scenes. Let's think we want to have a cat and a dog. Then we choose from the menu: **Characters➔Animals Birds** and drag and drop them onto the first scene. We get the bubbles and add the characters' words.

If we want to edit the heroes (resize, copy, rotate, move in front of or behind other objects, delete) we can use the tool bar on the bottom of the window.

On the bottom of the screen, we can also:

- ✓ Change the colour of objects
- ✓ Create our own character
- ✓ Insert a character we like

After finishing the comic, we can save it or publish it. We go to the basic menu and choose **Save:**

We give a title and a description for the comic. Finally, we can make it public, private or share it with friends.

We can also create our own digital comic book, adding all the comics we have created. We choose this window:

HAVE FUN AND ENJOY!
